My children can't yet throw high enough to get the ball in the hoop!
 kids to young - I am sure that we will use it in the next few years
 The idea of what would go in its place sounds much more interesting than what is already there
 I don't know
 Kids too young at the mo
 kids like to use their bikes and scooters on it, as well as play with balls

I have answered these questions on behalf of my children - ages 7 & 9 one girl and one boy
If goal too close to tennis maybe disruptive.

If the football, basket area was in view of the play area that would be best - in my opinion.
With multiple children in our family, we don't need children tucked away out of site - they can all play, and I can see them all from central point!

At the moment I cycle to Hauxton to use the football goals so a local goal would be very much appreciated.

Happy for the basket ball net/goal to be in the same area as it is now if that's possible. Better away from little children using the play area.

SKATEPARK

People don't go to the park to play basket ball the either play at school or don't at all

I would really appreciate a new football/basketball practise area because I would use it a lot as my and my friend use the goal and basketball area at the moment most weekends. Thank you if you could make this possible. Also I think you could maybe organise some events to raise money for as I guess it would cost a lot if money.

The only reason for it to be near the green hut is that I thought the new play area would be bigger?!

I don't mind it to be near the green hut if that makes the play area bigger!

would worry about small children playing safely if it was near the new play area bith because of a flying football and also lots of older children gathering there.

We use the basket ball area as a smooth bit of tarmac for scooting, cycling, bouncing balls for young children - it would be great if there was a child height net as well as the adult one
My young kids would use it for scooters/bikes etc with an adult, so not worried about safety per se. I think it is good to have a concrete area for these activities and for learning to roller skate etc.

Thank you for answering this survey, your opinion is really important to us!
