

PHASES

01 MASTERPLAN

Erect Architecture have designed an inspired masterplan that allows changes to the Rec to be co-ordinated, both now and in the future.

02 THE COPSE PROJECT

With the help of the SSYI we have cultivated our wild side down by the river! Including a wildflower meadow, den building area, a willow dome and a new bridge over the ditch!

03 SERVICES & STORAGE

To free up space on the rec and around the pavilion, the sports equipment storage has been relocated, plus a new services connection point has been installed, enabling more flexibility for events on the Rec.

04 SHELTER

The rather tired green shelter will be given a makeover using a winning combination of 3 designs generated by our competition. The old 'red' horse and roundabout will join the shelter as quirky seating elements.

05 INCLUSIVE PLAYGROUND

An inclusive playground featuring unique and imaginative elements that can be used by children of different ages and abilities in different ways!

06 WHEELSCAPE

A low level hard landscaped area designed by skateboarding specialists, for both learners and the more experienced to practice their wheel skills.

07 ENTRANCE & PARKING

The Parish Council have set aside £56k to create a new safer pedestrian entrance to the Rec from Woollard's Lane, and to create some new car parking spaces.

08 BALL GAMES

A new combined basketball hoop and football goal, dug into the banking next to the green shelter. Bringing the main play aspects closer together.

09 ADVENTURE TREE

Possible future project to add a bespoke, challenging natural climbing structure on the site of the current basketball court.
